Finding support: Organizations funding URE work

Funding matters.

Scholars across disciplines and countries are engaging in work related to the use of research evidence (URE). Their work is funded by a range of sources, from private philanthropies to government agencies, demonstrating the scope and scale of commitment across the globe.

HOW DID WE GENERATE THE LIST?

In an effort to “map the field” we conducted a brief survey through a snowball sample of research use networks across disciplines. We received 88 survey responses and report on one item: *What funding sources have supported your work if any?*

HOW SHOULD I USE THIS?

We share this information to clarify the scope of support for this work and to promote funding opportunities and potential collaboration among URE scholars and leaders across organizations.
